ZIEH-FIX® Tool Bell
ref. 00231

Professional tool for the plug-pulling and destruction of profile, round and oval cylinder locks

This special tool, developed for locksmiths and governmental agencies, allows the easy and efficient removal of any type of (profile, round and oval) cylinder locks. The "BELL" allows the fast opening of doors without damaging the door or the door guard. Using the plug extractor plates for the pulling of plugs, it is also possible to only remove the plug itself from the cylinder, allowing quick and easy access to the locking mechanism.

The Tool Kit contains:

ZIEH-FIX® Premium
ref. 00701
Plug extraction on profile cylinders as well as tearing apart the bridge possible.

Most powerful extraction tool out of our catalogue.

ZIEH-FIX® Premium Tool Kit
ref. 00701m

Premium Tool Kit
With ZIEH-FIX® Premium the traction force is increased by the conception of the tool. It is sufficient to pull the lock into the tool opening and break the profile cylinder through tilting and bending movements. High-quality multiple-bolting locking systems will make it necessary to extract only the cylinder core. The tool was developed in cooperation with security- and rescue teams for the use in this field.

The tool kit contains

Specifications:

- Collet (Ø).............................3 - 8 mm
- Grinding tool (Ø) max. .......38 mm
- No load speed....................25,000 min-1
- Battery..............................18 V / 3,0 Ah
- Weight..............................2,0 kg
- Dimensions (L x W x H)......400x79x118 mm
Accumulator Straight Grinder V28
ref. HD 28 sg 0
Handy 28 Volt Accumulator Straight Grinder, ideal for milling the cylinder plug and the protection rosette.

Technical Data:
- Battery capacity 28 V / 3.0 Ah
- No-load torque 1. / 2. Gear
- 19,000/22,500 rpm
- Maxi. Grinder pencil-Ø 25 mm
- Weight (with battery) 3.05 Kg

LITHIUM BATTERY!

Cordless Angle Grinder
ref. HD 28 ag
With a 28-volt motor and M28™ LITHIUM-ION battery, it delivers the speed (8,000 RPM) and power needed for fast grinding and cutting applications with longer run time.

Technical Data:
- 28V™ motor delivers 8000 RPM no load speed
- Overload protection for preventing over-heating

LITHIUM BATTERY!

Accessories for Front Grinder
Milwaukee, Accumulator 14.4 Volt / 2.4 Ah
ref. 1727
Battery-Pack:
- 14.4 Volt (System 3000)
- Capacity: 2.4 Ah
- Battery Type: NiCd

Milwaukee, Mobile Akku Charger 12/24 Volt
ref. 1737
With plug for cigarette lighter
Charge time Akku 14,4 V / 2,4 Ah: approx. 65 minutes

Kitbor. Chubb Lock Opening Set  
ref. 00190

With this tool it is possible to open high security systems with double bitted key destruction-freely and to produce a duplicate key.

Hold tension to the bolt mechanism of the lock with a counterbalance bar and counterweights. Now move with the sensing device every individual lever of the lock to the right position that is necessary to open the lock.

At the sensing device is also an index finger. On the basis of the template installed at the lock, the index finger shows the key cut depth that is necessary to duplicate a key.

The set contains:

We highly recommend our Kitbor seminar for a better use of this tool.

Opening Special Locks Kit

ref. 00490

The tools in this set are especially designed to open special locks type H. It includes a cutting crown welded in cold in order to avoid getting hot, and a repairing kit for later placement.

Measure of the cutting crown: 51 x 70 mm

Optional

ref. 00491

It includes a golden hard steel protector and a polished coating ring.

ref. 00489

Centering tool Kit

Guide and cutting action

Once cut, get out the centering guide and go on cutting hard plate.

After the arriving the hard plate, get out the protector and unscrew the cylinder. Time used: 7 minutes.
Plug Spinners
Use the plug spinner to rotate the plug super fast in the right direction without relocking if you have picked the cylinder in the wrong way.

Simply pre-set the nose, insert the blade in the keyway of the lock and press the button.

Flipper
ref. 00293w
The cylinder plug accelerator "Flipper" is used after successful picking the lock with. The accelerator is thrilled according to the necessary rotation direction and removes the cylinder plug after release of the tension in a fast rotation, so that the pins don't drop back into the pin's drill holes of the cylinder housing and will possibly lock.

The "Flipper" will flip the cylinder plug past the upper pins and save you the job of repicking. The "Flipper" comes with two exclusive features. The two pins, quick lock/release feature allows for easy release of the rotating action. The sure stop feature prevents over-winding in either direction.

Gun Plug Spinner
ref. 00292
The spinner’s heavy duty torsion spring and loading pin allow for rotating in either direction at varying strengths and speeds, making sure you only have to spin once. Plus, the easy to hold gun-like grip allows for perfect control when spinning the plug on a picked lock is required.

This tool is especially well suited for spinning locks that include the extra pressures supplied by plug return springs and is the only one turning tool in the world that can adjust spin strength.

"Little Joe" II Gun Plug Spinner
ref. 0555-rgn-flp
Perfect For Spinning Light To Heavyweight Lock Plugs.
The spinner’s heavy duty torsion spring and loading pin allow for rotating in either direction at varying strengths and speeds, making sure you only have to spin once. Plus, the easy to hold gun-like grip allows for perfect control when spinning the plug on a picked lock is required. This tool is especially well suited for spinning car locks that include the extra pressures supplied by plug return springs and is the only one turning tool in the world that can adjust spin strength. This model is specifically made for the use with "Little Joe".

New Spinner
ref. 10097
This spinner’s is great because of its heavy duty torsion spring

Super Mica
ref. 00471
The opening cards are manufactured out of high-flexible plastic, fit in the fold of the door and allow to slip the latch.
- set of 5 pieces per pack in 2 different thicknesses
- out of a material with high quality to glide
- with additional application of silicon spray - "Fantastic Plastic"
- works on most tightfitting doors

Handle for supermica
ref. 1098b
Handle for door latch opening cards. The handle allows a solid fix of the card. Consequently, working with bigger pressure is possible without running the risk of injuring yourself by the card.
The special feature is that door latch opening cards can be punched with a simple paper punch and then be fit into the handle.

Door Latch Opening Glider
The Door Latch Opening gliders are made from a type of steel specifically created for their use. They allow a fast and easy opening of doors that are "only" closed, but not locked.

Electro Pick Set
ref. 00270

The cordless rechargeable electric pick gun works after the principle "Transfer of Energy". The necessary hit frequency as well as the hit hardness of the pick is produced by an eccentric motion. That way a simple opening of pin and disk tumbler locks with several pins is possible.

The electro-pick allows to duplicate exact raking motion at many times per second. The gun rakes open pin and disc tumbler cylinders using a rapid up and down striking movement, which causes the top and bottom pins to separate, meeting the shearline.

This tool meets all future requirements through continuous new developments of pick needles and accessories from our production.

- Developed and made in Germany
- for high standards
- manufactured with extremely precision
- simple handling

The electro pick includes:
- 00271 plastic case
- 00272 charger 12v
- 2701E straight blade
- 00288 angel blade
- 00241 straight tension wrench
- 00251 angel tension wrench
- 00264 long tension wrench
- 00265 extra long tension wrench

You can also have the complete set with the next tools:

Pick Set for Electro pick
ref. 00285

Picks for multipoint cylinders
Recommended tool for multipoint cylinders with wide keyhole.

To be used with ref. 00270

www.vicunatools.com
New Electronic Pick
ref. 3600EC

This tool is a modification and improvement of the ref. 00270, which has generally been part of the standard equipment of locksmith alongside one of our developed picking tools.

Over the course of the last years the manufacturers of cylinder locks have been taking technical provisions to prevent the manipulation of the lock cylinders.

The actual innovation and consequently the core piece of the ZIEH-FIX® Electronic-Pick is the new electronics, which has been completely integrated into the handle and therefore allows to regulate the high percussion frequency necessary for opening even high-quality lock systems.

Also new is the incorporated battery compartment in the handle which enables a smooth replacement of the energy source and is suitable for internationally used batteries (3 x LR14, 1.5 Volt) as well as rechargeable batteries.

In case of new developments the tools can be upgraded by re-programming them in our factory. Information to this will be published on our web page in due course.

The new handle with the incorporated electronics is available separately. Consequently all old models of the ZIEH-FIX® Electro-Pick II (with the black handle) can be altered if necessary, as the gear heads of both tools are compatible.

Beside the Electro Pick the set also contains:

Plain Raker Changer for Electro pick
ref. 00285a
Plain raker adjustable to Electro Pick (Ref. 00270)
Ideal in opening multipoint cylinders.
Its vibration is horizontal.

Novum pick set
ref. 00305
Especially when confronted with complicated lock cylinders difficult to pick, only the use of laser-cut picks blades made from hardened spring steel may lead to success.

These pick blades can be used with the Electro Pick and with a handle. The set comes in a leather case and contains 39 picks of stainless steel (3 pcs. of each form), 1 tension wrench and 1 handle for the use as a handpick.

Novum Picks
These different pick needles allow the use of the Electro Pick in locks with narrow or complex keyways and also in locks with extreme lock codes.

Impression Technique: Key Blank Holders

Grip specifically developed for the impression technique. Maintains a true centerline and grips the key so it can’t slip.

Universal Key Blank Holder

**ref. 00525**
- ergonomic grip
- allows a strong connection with the key blank
- for every kind of cylinders
- steel and nylon made
- Allen key included

New Universal Key Blank Holder

**ref. imms001**
- automatic grip
- no Allen key needed
**Optical Impression Technique Instrument**

ref. 00550

This simply to handle tool makes an extensive opinion of the key possible and allows among others to decide the spatial dimensions, the depth of the cuts etc.. All data are to be read off clearly on the scale.

**Quadview Plus 2**

ref. 00552

Whether you are impressioning keys, inspecting lock parts or working on time lock movements, you'll appreciate the sharp, clear magnification and illuminating side lights on this product.

In this model, the side lights and lens options are built-in and easily accessible.

Four levels of magnification (1.8 to 4.8) are built in:
- Magnification 1.8 - Lens 1
- Magnification 2.3 - Lens 1+2
- Magnification 3.7 - Lens 1+3
- Magnification 4.8 - Lens 1+2+3

The Quadview Plus 2 is lightweight in design with an adjustable velcro headband. You can work for hours without discomfort.

**Scope for I/T**

ref. 00550c

This new scope with 2x lights in different colours lets you see the marks in the key when Impression technique or bright are applied.

**Mini Drill For Impression Technique**

ref. 28515

Drill/Burr for Impression Technique.
- It includes 34 tools.
- Source Power 220/240V

www.vicunatools.com
**CLAM™ Kits**

**Large Clam Kit "LKM 1178"**

ref. 00555

Designed to give an exact image of a key, the Clam allows the user to conveniently cast a replica key. Duplicates of rare and historic keys may be created by utilizing the Clam. The duplicates can be cut at a later date or different location. Duplicates of the bit on a high security key can be cast and preserved for later duplication resulting in considerable savings for the customer and a high margin sale for the safe technician.

---

**CLAM™ Kits**

**De Luxe Clam Kit "LKM 1187"**

ref. 3848

Designed to give an exact image of a key, the Clam allows the user to conveniently cast a replica key. Duplicates of rare and historic keys may be created by utilizing the Clam. The duplicates can be cut at a later date or different location. Duplicates of the bit on a high security key can be cast and preserved for later duplication resulting in considerable savings for the customer and a high margin sale for the safe technician.

---

**Quick Key**

ref. 00555a

This key-duplication system consists of high-tech plastic molding components and a special cast alloy (cast metal). The system satisfies even the highest requirements and allows the absolutely precise, fast and easy duplication of keys of any type of locking mechanism.

---

**Box Set to make keys**

Box to make keys manufactured in PVC in order to get samples of keys.

Cross Picks
ref. 00470
This manual picking tool allows the opening of simple cross locks. It’s four direction blades are made of quality strong carbon steel blade different with steel wire (easy to break).
It can insert into cross cylinder to open very smoothly.
This A-Grade Cross Pick includes 2 tension wrenches: one long tension wrench, one short tension wrench to fit for different size of cross cylinder and different size of thickness of door.

Special File
ref. 9565701
350 mm Special File. Suitable for keys prepared for Impression Technique

Decoder for padlock
ref. 00780
The high-precision tool for Abus Granit disc locks. Using this tool is relatively simple thanks to its easily readable depth scale. Still, in order to be successful some practice is required.
Length: approx. 110 mm
Weight: approx. 120 g

Mini Lighter
ref. 00792
Ideal for releasing locks when glue or silicone is inside. You can charge it like a normal lighter.

new!
An extraordinary new Cross Pick.

new!

www.vicunatools.com
Ring Pliers
ref. 00604
New pliers designed to close cylinder rings.

Clip Opener
ref. crt 2
This tool is ideal to turn off the clips inside the cylinders.

Convertible Truarc Ring Pliers
ref. 00603
The Convertible Truarc Ring Pliers can quickly and easily convert from ring compressor (external) to ring spreader (internal).

Shim-Holder Tools
ref. 10072
Dismantle cylinders Set
New case.

new!
SHUT-22
ref. 00602
The Adjustable Follower does it all. The spring action bar allows the tool to fit all standard locks.

Shims
ref. 00596
Shims to dismantle cylinders inside.

Shim-Holder
ref. 00595
This tool holds curved shims without slipping. Also helps prevent cut fingers. To loosen, simply tap the end on a hard surface. Then, insert the shim and refit to desired length.

Pins Box for re-pinning cylinders
ref. 00951
It includes:
- 144 pins of each measure
- 85 different measures diferentes
- Pins anti-pick
- Measure increasing 0,5 mm
- All the pins coloured
- Metal box
- 8 Kgs.

New!

Pin Box ISEO
ref. 100300
ISEO pin box to master ISEO cylinders.

New!

Pin Box Tesa
ref. 01000
ISEO pin box to master TESA cylinders.

www.vicunatools.com
Tool for New Mottura
ref. 5705
High-quality pump cylinders of "Mottura" can be decoded and unlocked destruction-free with this new accuracy tool.

Pump Lock Decoder
ref. dmottura
Pump Lock Decoder set. Auto Impression tool to unlock pump locks in 3-5 minutes.

For Mottura and Potent Locks!

New!
Tool for New Iseo
ref. 5706
Tool specially designed for opening and decoding ISEO lock.
Comes in an approved plastic carrying case with foam-lined interior.

New Tool for Unlocking GERDA lock
ref. GERDA LOCK
A new tool for unlocking and decoding the pump lock GERDA.
Foil Tool
ref. 0710
11 pieces Double-suite can technically open European Locks of: BASI, BKS, CVL, DOM, EZCURRA, DS 15, FAC, ISEO, LINCE, MCM, MUL-T-LOCK, TESA T60, UCEM, WILKA and other locks like crescent-type buyang, AFA, double-nine, Murray Bulgaria, Vanguard, Coradi double beads, ho di, Dunfa, Jia Wie, Paul Dean, Aipu, single beads, with the new and old Gabriel, Buttonyang, Europe and United States Lun double bead AB Kabbah lock.

---

Door Handle Opener for Double Bitted Key Systems
ref. 00427
The tool makes possible to open a door through the keyhole of a lever mortice lock with double bitted key.
- Only for systems with double bitted keys
- For locks of CISA, Mottura, FAC, CR, Juwel, Ezcurra, etc.

---

Knee Pad Safe Technician
ref. 4729
When was the last time you went to open a safe and you did not have to get down on your knees, usually on concrete, to do part of the safe opening. This foam knee pad has Safe Technician imprinted on it and takes the pain out of being on your knees.
Morticer Jig
ref. 01006a

The best value mortice jig available. Cuts a mortice in all wooden & aluminium doors. The jig and its precision cutters will cut a mortise in hardwood, softwood, composite doors and with the use of special cutters, aluminum doors as well, all in under five minutes. For best results use a drill with 2-3000 rpm with "Hammer Action" off and 12.7 mm (1/2") chuck. Maximum Mortice depth: Standard Shaft 90 mm (3.5") and optional Long Shaft 154 mm (6")

Further Available accesories:
Ref. cutters
01008 wooden, 16 mm
01009 wooden, 17,5 mm
01011 wooden, 20,6 mm
01013 wooden, 23,8 mm
01015 wooden, 27 mm

01012 wooden, 22,2 mm
01014 wooden, 25,4 mm
01017 aluminium, 19 mm
01018 aluminium, 25,4 mm
01019 aluminium, 31,8 mm

The delivery also contains:
Wood Cutter, 19 mm (3/4") Ø
Wood Cutter, 22,2 mm (7/8") Ø
Wood Cutter, 25,4 mm (1") Ø

Long Drill Kit
Available in 2 measures:
ref. DBB/HK/LD 10950 10 mm x 950 mm
ref. DBB/HK/LD 101250 10 mm x 1250 mm

Long Drill Adaptor for Lock Jig
ref. DBB/LD/A

www.vicunatools.com
Broken Drill Bit Un-Winders
ref. p bdb-uw

Turn that broken bit loose! A metal chip strong enough to break a drill bit can make getting the tip un-jammed a tough job. Our set of 4 spring steel tools gives you the reverse force needed to free a wedged bit. Just a twist of the wrist, or LIGHT tap of a hammer, gets that stubborn tip loose and ready to remove with our Broken Drill Bit Extractors. Designed for 3/16 and 1/4 inch drill bits.

Tilting Window Opener
ref. 00609

Three-part set to open tilted windows over the inside window handle. 

Place the handle over the Windows
Open the window with the guide wire
Get out the guide wire
Pull out the Windows

Decoder for door fittings with magnetic function
ref. magnet-dec

Decoder for door fittings with magnetic function, e.g. DiSec etc.

Two adjustable magnetic fields make the manipulation of magnet fittings possible.
Safe Repair Kit
ref. 04446

Drill holes can be locked durable with the materials contained in the Kit.

The Kit comes with:
- five different kinds of conic tapered steel pens
- four different kinds hard metal balls and
- one hard metal drill

Opener for Panic Doors
ref. 1078 v

In most cases, this tool enables an opening of unlocked doors, that are to be opened to the outside. With this door latch retractor the latch can be pushed back. Suitable only for normal-offset doors.

Demo for Picking
ref. maqueta
Demo Lock for picking

New!

Demo for Testing with Safe Locks
ref. soporte
Demo Lock for testing with Safe locks

New!
Key Cutting Machines

**ref. capri**

CAPRI is the new JMA key cutting machine for security, wave, tubular and special keys, designed for key-cutting professionals. The CAPRI key-cutting machine is a striking step forward compared to other manual key-cutting machines, as it incorporates a novel patented system for measuring the cutting force, making cutting easy and precise.

**Technical features**
- Motor: Universal 220V, 50Hz, 400W, 16000 rpm.
- 430 x 465 x 385; 25kg.

**ref. saratoga**

MIXED machine with 2 units:
1. Cutting of flat keys (cylinder lock and car) and cross-shaped keys, with a reversible 4-side clamp and a micrometric tracer point with centesimal adjustment.
2. Cutting of mortise lock keys (single and double blade), front keys and special keys like ref FO-4.P and FO-6.P keys. It also has 3 optional slides for cutting regata keys (RG)(SEA, OPEL, MERCEDES), for code copying of FO-6.P (FT-COD) keys and also a slide for Abloy keys (ABL).

**Motor**
- 220V-50Hz

**Information**
- 590 x 260 x 470; 43 Kg

**New Tools for grasping small objects**

Alligator & Kelly forceps are surgical instruments used for grasping small objects or removing items from small cavities in the body.

Rubber Cap for Spectacle Weavers

**ref. t-05.99.629**
Accubox I, 12 V with brightness control, incl. battery and mains transformer, without connecting cord

**ref. t-04.99.641**
Rechargeable battery NiMH
Semi Flexible 4,5 mm. Ø Endoscopes
ref. 10218
Designed for up-close focusing in tight places, the high-resolution lens provides a clear image of objects as close as 19 mm (3/4") while providing a wide, 40° field of view.

Dial Puller
ref. LKM 1095
Removes Dials Quickly With Straight Line Reverse Thrust Produced By A Sliding Weight. Just center the cup over the dial, secure the allen screws and with just a few strokes the weight removes the dial. The Dial Puller works on any pressed-on or glued-on dials with minimum effort and damage.

Change Key Set
ref. 00050
The 12 Most Common Change Keys - A Must For Every Tool Box. Each key is individually labeled for easy identification and all are made of stainless steel for durability to prevent rusting.

Fits
Diebold 3-wheel & 4-wheel,
LaGard 3-wheel & 4-wheel,
Mosler 3-wheel & 4-wheel,
S&G 3-wheel,
S&G 4163,
AMSEC
Group 1R,
3-wheel padlock.
Ultrathermic Cutting System "HOT SHOT" Complete Kit

This assembly consists of a torch, 15' of oxygen hose, a striker plate with a 15' power cable, two battery clamps, a leather shield for protection during piercing operations, and two collets for adapting either 1/4" or 3/8" rods to the torch.

In addition to this torch assembly, the "HOT SHOT" Complete Kit includes a back harness assembly, rod and striker plate holders, an oxygen cylinder (5 litre), a regulator, a battery ignition system (with charger), welding gloves, safety goggles and two Stix Paks of ultrathermic rods (9 rods 1/4" x 18" and 9 rods 3/8" x 18").

Broco's Ultra-thermic systems operate at temperatures exceeding 10,000 degrees F, eliminating the need for surface preheating.

- Repairs are made without raising burrs on bearings and bushings because an electrical current is not required.
- Broco's system does not leave carbon deposits eliminating the need for surface grinding and gouge cleaning.
- Broco's Prime Cut systems are safer than other types of equipment because they do not require high amperage or potentially dangerous acetylene (or any other secondary fuel).
- Prime Cut systems produce less noise, smoke and noxious gases than other systems increasing operator comfort and safety.
- Prime Cut's user friendly features have been task engineered for simplicity of operation. The 12v DC ignition system, single oxygen fuel source with one regulator, and completely self-contained portable kits ensure that Prime Cut systems are easy to operate even for less experienced users.

www.vicunatools.com
Ultrathermic Cutting System "HOT SHOT" Kit
ref. 00002

The finest exothermic equipment for military and law enforcement breaching applications. In service by the best special forces, counter-terrorist and law enforcement groups worldwide.

From portable lightweight systems to custom heavy duty field equipment, Broco constructs torch kits to meet the needs of specialized applications. Broco torch sets are now carried on-board the U.S. Marine Corps’ M88A2 Tank Recovery Vehicle and the Army’s Forward Recovery System Heavy (FRS-H). Since 1985, specialists within the U.S. Army have extolled the benefits of exothermic torch systems for recovery applications. The Armor Center at Fort Knox recommended the removal of oxy-acetylene torches from recovery vehicles and replacing them with portable exothermic cutting units (PECUs). An exothermic torch can be fielded quickly, with minimum setup, no adjustment, and no preheating. A wider range of materials including exotic alloys and armor plate are easily cut. Thick sections like road arms and other suspension components can be severed in about a minute.

The kit contains:
Torch, striker plate, 20’ of oxygen hose, 20’ of power cables, two battery clamps, leather shield for protection during piercing operations, and collets to fit 3/16”, 1/4”, 3/8” and 1/2” rods.
It includes also a tool box, welding gloves, goggles and two sample packets of Ultrathermic cutting rods (9 rods 1/4” x 18” and 9 rods 3/8” x 18”)

Rod Extender
ref. 00003
A 1 meter assembly that increases the torch reach.
Ultrathermic Cutting System Rods

Rod 1/4" x 18"
ref. 00007
Burn time: 35 sec
Main uses: cutting steel to 5/8" thick, removing large bolts, small pins, piercing hard plate

Rod 3/8" x 18"
ref. 00008
The most widely used rod size. Cutting cast iron to 1.5" thick.
Removing welds
Burn time: 45-50 sec
Main uses: cutting steel to 3" thick, removing pins to 8" long

Rod 3/8" x 36"
ref. 00009
Removing pins 8"+ long, cutting aluminum, melting concrete, cutting cast iron to 2.5" thick.
Burn time: 1 min 30 sec
Main uses: cutting steel plate to 3" thick, cutting steel shafts to 6" dia.,

Rod 1/2" x 48"
ref. 00010
Cutting shafts to 12" dia.
Burn time: 2 min 30 sec
Main uses: cutting steel to 6" thick, cutting cast iron to 4" thick

Rod 3/16" x 18"
ref. 00011
Burn time: 30-35 sec
Main uses: removing broken bolts, cutting locks, covers, hasps

The advantages of electronic technology are here at last. Simply set-up the ITL2000II on any standard combination lock (dials right-left-right) with the easy-to-follow instructions and watch as the computer and drive motor go to work for you. Soon, the automatic dialer will have the lock open, saving time, materials and excess labor costs. The ITL2000II can cover the million conceivable combinations of a standard 3 number combination lock in under 30 hours. If one number is known, it can open single-function locks in less than an hour. Powerful enough to work on Mosler 302s.

Features:
- Lighter programming touch on the key pad
- Designed to work unattended
- Standard 120 V, 60 cycles (available in 240 V)
- 1 year warranty on workmanship and materials
- Auto shut-off when the combination is found

The Safe Manipulator TSM

This is a third Generation Manipulation Aid. Intended to assist the manipulator with manual combination safe locks. The Safe Manipulator TSM measures the contact point changes, gives a graphical display with high and low readings, and also a gives a visual display of the wheel positions. (This product requires the facility of loading onto a computer to function - therefore the product needs to be loaded onto your own computer or laptop.) The Safe Manipulator TSM has the ability to allow the operator to plot the circumference of each wheel. This product now has a resolution, such that, each division of a ‘0 to 100 dial’ is divided into 40. (Currently has an accuracy of 4000 points per revolution). The Safe Manipulator TSM has the facility to store and save the settings, so that one can leave the job and then return.

The set contains:
- Magnetic Stand
- Program CD
- Super Glue
- Power Supply Unit
- Rotary Encoder
- Interface
- Couplings Assembly

Laptop or computer not included!
Stethoscope Lock Amp  
ref. LKM1116AMP

Amplified Stereo Listening Device. This device features stereo magnetic microphones with volume control. The handsize amplifier attaches to a safe by a magnetic mounting plate. The lightweight stereo headset lets you hear those contact points and mechanism operations clearly.

Set includes: Amplifier, 2 magnetic microphones, Head-set, Batteries and Carrying case

Telescopic Picks

Set of telescopic picks to unlock two-lever safe locks. Made in stainless steel. The best picks in the market!

Telescopic Pick for SARGEANT & GREENLEAF  ref. 8040
Telescopic Pick for STUV HAGLIN  ref. 8041

24 mm hole depth
Pick Kromer Novum (Miralles)

**ref. 00108**
It’s a 2 in 1 pick with hollow tip
Long 355 mm dragging sleeve
Long 280 mm feeling sleeve
4,3 mm Ø hole
60 mm hole depth
Outer 7 mm Ø
Inner 5,50 mm Ø
Spoon-like dragging sleeve

Pick Kromer Convar (Miralles)

**ref. 00108f**
It’s a 2 in 1 pick with hollow tip
Long 355 mm dragging sleeve
Long 280 mm feeling sleeve
3,5 mm Ø hole
60 mm hole depth
Outer 5,45 mm Ø
Inner 4,40 mm Ø
Spoon-like dragging sleeve

Pick Pa 113

**ref. pa113**
It’s a 2 in 1 pick with hollow tip with dragging tip
91,5 mm long dragging sleeve
56 mm long Feeling sleeve
Outer 7,5 mm Ø
Inner 5,9 mm Ø
4,9 mm Ø Hole
**Telescope Lens**

ref. 00702a

It is a great view aid when opening safes.
- 32 mm Ø Mirror
- From 16 cm to 61 cm long

---

**Custom Pick for LaGard 2200**

ref. pick LAG2200

The machining and design of this tool is exceptional. The tube and wheel manipulation tip are machined from stainless steel to give years of service to the safeman.

---

**Wire Tool LDT LaGard 3600**

ref. LDT 3600 TL

This tool is designed to open the lock if you have a lockout for any reason other than a failed solenoid, by directly energizing the solenoid wires and allowing the lock to be opened. This tool can also be used on other electronic locks, although it might require drilling somewhere other than the spindle hole.

---

**Safe Vibrator for Electronic Locks**

**Safe Vibrator for Mod. Standard**

ref. SAFE-VIBRA-PEG

For house safes

**Safe Vibrator for mod. Strong**

ref. SAFE-VIBRA-VERS

For big safes
Magnum Drill Rig
ref. mag 45703

This drill rig can be used for template drilling or as a magnetic drill rig. The barrel is interchangeable between the two rigs. It allows you to get an easier and much closer view after drilling.

Power magnet
ref. magnet pw1

Suitable to manipulate electronical or mechanical locks.

Notice:
Magnet fields can influence or damage also electronic systems like pacemakers, storage media, instruments, clocks etc..
Careful transportation and conscious application recommended.
No liability at improper use!

Manipulation Lock. 5 pins

This cylinder makes your learning and training easier.

Manipulation Lock "Standard", 5 pins
ref. 8110
Manipulation Lock "Easy", 5 pins
ref. 8110-2

Cylinder with screw caps Iseo/ Tesa
ref. 01004is /01044te

This cylinder with screw caps has been designed to put and remove pins. It's very suitable for picking practice.
Tool for Safes
ref. JF combinaciones

Tool for opening safe combination locks. In only 15 minutes you can unlock the safe...with relocker.

Tool for Mauer 7111
ref. Mauer 7111

Tool for opening Mauer safe lock. No damage. You can decode the lock, too.

Decoder for Mauer Variator
ref. 8290
Tool to decode 8 & 11 lever locks
Decodifier for STUV 7
ref. stuv-7
Brand new decodifier specially designed for STUV 7 lever lock.

new!

Pick for AGA & MAUER
ref. 28349
Brand new tool specially designed for unlocking, without damaging AGA mod. 0246 and MAUER mod. 74046 safe locks.

new!

Decoder for lever locks with "curtain"
ref. 8288
Decoder for lever locks with "curtain"
Pin & Cam
The term Pin & Cam refers to the original design, which used a small cam to apply lift to the pins in the key tip. The basic concept on which the system works is similar to that which is employed by the impressioning technique.

This method is without doubt the most effective way of defeating high security lever lock mechanisms. The system is easy to use, relatively quick and provides the user with a working key and code for future use.

Pin & Cam for CHUBB model 6k174  ref. 8280
Pin & Cam for CHUBB model 6k75  ref. 8281
Pin & Cam for SLS, SMP y POWER  ref. 8282
Pin & Cam for SMP  ref. 8283
Pin & Cam for TANN  ref. 8284

Pick for Fichet
ref. m2b m2i
You will be able to unlock the Fichet m2b m2i without damage with this tool.

Made in high quality steel by one of he best manufacturers in the World

Wafer Reader
ref. 2525

Generate New Automotive Keys Without Removing Or Dissembling The Lock

The Wafer Reader works on cars using standard wafer style locks. Insert the tool into any door or deck/tailgate lock to quickly and efficiently read the lock tumblers. There is no need to purchase multiple tools.

One kit covers most domestic and import vehicles.

With just a few hours of practice, you can quickly generate keys for any car using standard wafer locks.

Just set up the reader and guide, insert them into the lock and pull out the reader to create a drawing of the key profile.

Use our gauges or site read the key profile to cut your key by code or simply attach the key template or drawing made with the Wafer Reader to the appropriate key and begin cutting with the Nibbler Key Cutter.
Car Opener Set Exclusive
ref. 1595
13 important car openers clearly arranged in a plastic carrying case.
Ideal for opening:

KIA, MAZDA, PEUGEOT, ROVER, DAIHATSU, CITROEN, HYUNDAI, NISSAN, BMW, SKODA, VOLKSWAGEN, OPEL, RENAULTLADA, SEAT, HONDA, FIAT, MITSUBISHI

---

Pick, 2-track Pick for VW
ref. VWEZ

This is a very simple to use pick for VW, Audi and Porsche vehicles using the HU66 Keyway, 2 Track internal High Security Key.
Simply insert the tension tool and then insert the pick blade and rake the wafers until the lock cylinder turns. These locks will pick to the unlock position easily.

---

Car Opener "Lazo"
ref. 7157

A 1.5 mts. tool for opening cars. Flexible.

www.vicunatools.com
Car Opener Rods

The tool is unlike any other on the market. When the handles of this tool are separated, the hook at the end of the tool is pulled inward causing the tool to grip or bind the horizontal linkage rod.

Car Tension Tool with Light
ref. 10220

This 2.7 mm Tool with LED light is specially designed for car opening. It has got side cuts to be set correctly.

new!

Professional Tension Wrench
ref. 0777- LKM- tn

This Tool is specially designed for car opening use which can provide locksmith very steady feeling. The tip of this strong tension includes 2 different necessary size of gaps to fit for every different car door cylinder.
- Blade: High flexibility carbon steel material
- Weight: 39 grams
- Handle: Stainless steel

Double Car Tension Tool
ref. 10046

New Tool designed for car opening.
Car Opening Light
ref. rgn 3770
Owl Long Light is a Car Opening Light which is very high intensity can provide a very light view to help locksmith to inspect and watch inside a car door. Can also insert into hard-to-see area while car repairing.

Specification:
High quality aluminium alloy handle
Length of wand: 15.8" (40 cm) bendable wand
With the best Japanese new intensity LED white light
With a suction cup to attach on the glass of car
Weight only 86 grams, it can be put in the pocket
Operates continuously for 72 hours on a set of replaceable batteries.

Mini Premium
ref. 00705
Outstanding tool for plug extraction of car ignition locks.
- Small measurements
- Traction forces are exactly measurable
- Ideal for wrecking-services and exploitation companies

Car Opener
ref. 00700
With this extraction tool door locks and ignition locks can be removed quickly. Subsequent opening and starting of the vehicles are possible with a screwdriver.
Each expert knows how difficult and time consuming the milling out of the ignition lock can be and how time-consuming and ungrateful these works are.
This technique also uses the ZIEH-FIX® Pull Screws, which are screwed into the keyway. The tool can also be used with locks in the handlebars of motorbikes. Finally you can avoid splinters in the bearing of the bike's handlebars
- Also suitable for motorcycle locks - no more chips in the steering tube
- Delivery with Percussion Hammer of 600 g weight
- Ideal for wrecking-services and exploitation companies
- additionally a Percussion Hammer of 1600 gram weight is available

Software for Order No. 880-BMW-KPR
ref. 880 soft KPR
The software is now on the USB dongle. So you can install the software on several computers. Depending on the computer you want to use you only have to insert the USB dongle.

- With this software the newest automotive locks could be decoded. After the determination of the code with the corresponding decoder the read code is to enter in the programme. The software converts the code and announces some suggestions of key codes.
  One matches!
  BMW - 2005 on
  At present only for Windows versions up to XP available!

BMW Precision Car Opening and Decoder Kit
ref. 880 bmw2- KPR
This precision kit was built specially to cater the increasing demand for a solution to the new high security BMW locks. When there is no keys or when the keys are in the car (passenger compartment or boot).

The Kit contains:
- 1 Decoder
- 16 half keys which cover all combinations available for all BMW cars with 2 track locks.
- Writing charts
- Solid head
- Hex screwdriver

VAG Precision Car Opening and Decoder Kit
ref. 880 VAG- KPR
This precision kit was built specially to cater the increasing demand for a solution to the new high security VAG locks. When here is no keys or when the keys are in the car (passenger compartment or boot).

The kit contains:
- 1 Decoder
- 28 half keys which cover all combinations available for all VAG group cars
- Writing charts
- Solid head
- Transponder head
- Hex screwdriver
**European Lockmaster® I.D. Badge Case**

*ref. 3007*

On the first side of the case there is a window that protects an identification card and on the second side you find the "Lockmaster®" Star.
- Gold plated
- Shirt Pocket Size (closed): 10.5 x 8.5 cm
- Diameter of the "Lockmaster® Star: 5.5 cm

---

**Car Opener Big Jim**

*ref. 00720*

It has prescribed depth graduations on its face to find exact pick up points.

- the classic opener!
- new production because of high demand!
- manufactured of high-quality spring steel

---

**Pick Master**

*ref. 00790 master*

Pick for unlocking car locks.  
A very useful tool to practice the jiggleling technique.

---

**Decoder for TIBBE Version De luxe**

*ref. 00791*

The Ford Tibbe Decoder Pick is a modified Wheel Pick which is capable of opening and decoding both the Ford 6 disc and Jaguar 8 disc versions of this locking mechanism. The system can be used on the doors, the boot or the petrol cover. We suggest that it be used on the front driver or passenger doors.

Once the door has been successfully opened the tool can be used to identify the locks code so that a key can be constructed for further entries. The system can be used as a kind of variable key so that the lock can be opened a second time without a key and without the requirement to re-pick the mechanism. The system will also work on both the old and new versions of this lock unlike other systems which have been developed recently.
Autosleeve
ref. 00691
The Auto Sleeve helps prevent damage to weather stripping and automobile finish. This hardened plastic interlocking envelope is ideal for separating weather stripping from door frames or windows without damage. Once in place, the Auto Sleeve gives you a protective tunnel to insert your car opening tool without worry of scratching or damaging your customer’s car. The Auto Sleeve works very well in conjunction with the Pump Wedge (ref. 00799)

Auto Wedge
Auto Wedges are designed for smooth, safe insertion and will not fall into door cavities. The special angled tips allow for easier insertion and the sure-stop edges stop you from pushing these wedges in too far.
ref. 00808 9,5 mm Thick
ref. 00807 19 mm Thick

ref. PW100
POWER WEDGE
Power Wedge is a spring loaded compound lever that safely spreads a vehicle door away from the body, allowing for the easy entry of a "Through the Car" opening tool. It slides into the opening between the vehicle’s door and frame at the top of the door. The rubber-coated ends protect the vehicle from scratches and the adjustment knob allows you to control how wide you need the door to open.

Simulator Set
ref. 00790
A set of 14 jiggler keys to help open all kind of cars as well as numerous other locking devices. Works on both pin tumbler and wafer mechanisms.

Jigglers
Car Key Jigglers
ref. 00789
A set of 10 jiggler keys to help open all kind of cars as well as numerous other locking devices. Works on both pin tumbler and wafer mechanisms.

Keys, locks, treasure boxes and mounts
Text in German and English, 170 pages, more than 250 pictures, many illustrations about the function of locks and padlocks.

American Genius
ref. Buch-Erroll

On West 44th Street in New York City, on the second floor of the General Society of Mechanics and Tradesmen building, rests an extraordinary display of American craftsmanship and ingenuity from the nineteenth Century: the John Mossman Collection of bank vault locks and time locks. Designed to protect America’s riches from every threat, these beautiful devices embody the evolution of lock technology during the nineteenth Century, its most creative period.

Many of the handcrafted masterpieces are elaborately decorated with intricate engraving and casting, despite the fact that their mechanical interiors would rarely be seen. They reflect the great pride in creative workmanship and the mechanical genius that characterized American industry at the time. The famous Parautoptic lock with its eighty-three moving parts remained unpickable for ten years until Linus Yale learned its weaknesses and exposed them to the public in the pages of the Boston Post. The Double Pin Dial time lock of 1875 could be set to lock or unlock automatically at every hour of each day, and for an extra $50, a "Sunday Attachment" would allow the lock to remain locked every seventh day. With the United States' entry into World War I, safes and their locks were often melted down; as a result the Mossman Collection is home to many one-of-a-kind masterpieces. American Genius is the most complete survey of these marvels of complexity and their dramatic history. Detailed text by Mossman Collection curator John Erroll and his son David is illustrated by more than four hundred luminous photographs, the first formally approved color imagery of the collection, by Anne Day. Drawing on newly uncovered original sources, the authors offer an in-depth look at the incredible range of the lockmaker's art, from some of the most complex key mechanisms to the most advanced four-movement time locks. American Genius is a meticulous and fascinating exploration of a remarkable but little-known chapter in American technological achievement.

Masterkeying

Masterkeying is an integrated locking system in which a cylinder can be opened by more than one different key. Thereby allowing control of user access by more than one staff member, whilst maintaining the convenience of using a minimum number of keys.

With an adequate locking plan each cylinder is opened only by the keys, and consequently only by the people desired.

The masterkeying does not increase the physical security of the lock, this is taken care of by the access system itself, but it does establish control.

For this reason it should be, first and foremost, functional and simple, in order to ensure security and allow for expansion.

You can order your master key systems right now!

Orders will be delivered at soon as possible. In about 2 days time

OPTIONAL:
- Cylinder and Key Carving (names or numbers)
- Masterkeying
- Code Keys
Training Courses

General Opening Technique

Trained by José Luis García de Vicuña
Duration: 2 days
(Timetable: 10-19h)
Number of Students: 4 people

CONTENT:
- Basic notions of different kinds of locks.
- Lever & pump locks.
- How does a cylinder work? Parts and lock case (dismantle).
- Cylinder alignment.
- Preparing a master key system.
- Unlocking cylinders with extractor tools.
- Shield Protection Manipulation
- How do we unlock with Electro-picking?
  - Tubular locks.
  - Hand picking.
  - Bumping Technique
  - Unlocking Tricks.

This Training Course includes 1 HOTEL NIGHTS, BREAKFAST AND 2 DAYS LUNCH.

Lever Locks Opening

Trained by José Luis García de Vicuña
Duration: 2 days
(timetable: 10-19h)
Number of Students: reduced groups
Tools (included in the price)
- Kitbor Kit
- Magic Key 2 for Mottura +6+ - Nucleo

CONTENT:
- Use of the latest techniques and tools to unlock without damage the most of the lever locks in the market.
- Very interactive course.

This Training Course includes 1 HOTEL NIGHT, BREAKFAST and 2 DAYS LUNCH.
Training Courses

Car Special Course
Trained by José Luis García de Vicuña
CONTENT:
- Duration: 3/4 days (usually 10-19h)
- Number of Students: 8/10 people

Unlocking real car locks.
Mercedes, BMW, Ford Tibbe, Ford C-Max, Audi, Renault, Peugeot, Citroën, etc.

Decoding the cutting of the key by using the latest techniques with decoders.
Key programming and copying.

Car Opening (Only Opening)
Trained by José Luis García de Vicuña
NEW CONTENT:
- Duration: 1 days (usually 10-19h)
- Number of Students: reduced people

Unlocking real car Locks.
Mercedes, BMW, Ford Tibbe, Ford C-Max, Audi, Renault, Peugeot, Citroën, etc.
Decodifiers. Different picking techniques.

This Training Course includes 1 Hotel Night, Breakfast and Lunch

Safe Manipulation
Trained by José Luis García de Vicuña

CONTENT:
- Duration: 3 days (usually 10-19h)
- Number of Students: reduced people

Introduction to safes. Identify a safe.
Safe picking.
Changing combinations.
Wheel combination manipulation.
Drilling safes.
Use of techno-endoscope.
Introduction to digital combinations.

This Training Course includes 2 Hotel Nights, Breakfast and 3 Days Lunch.
Training Courses

Trained by José Luis García de Vicuña

Duration: 3 days  (USUALLY ON WEEKEND: FRI: 10-19H, SAT: 9-20H, SUN: 9-13H)
Number of students: 6 people

Tools (included in the price):
Mini Drill Proxxon, 5 mm Burr,
Special Files for Impression Technique,
Key Blank Holder, Optical Impression Technique Instrument.

This Training Course includes 2 Hotel Nights, Breakfast and 3 Days Lunch.

Masterkeying
Trained by José Luis García de Vicuña
Duration: 1 day
(10-14h & 16-19h)
Number of Students: 2 people

Masterkeying is an integrated locking system in which a cylinder can be opened by more than one different key. Thereby allowing control of user access by more than one staff member, whilst maintaining the convenience of using a minimum number of key

This Training Course includes 1 Hotel Night, Breakfast and Lunch
Vicuña Group

Trying to improve ourselves continually in order to give our clients a better service, we decided some years ago to broaden our horizons in the locksmithing services and activities with the only goal of satisfying the needs of our job: locksmithing.

That’s why the so-called Vicuña Group was born. The idea was to create a big and strong group of professional locksmiths who would have a series of services and advantages:

- Free Subscription to our issued Newsletter, where you can find news, techniques or new tools in the market.
- Discounts in tools and training courses prices.
- Counselling Service in the Car, Door and Safe Opening
- Vicuña Group have exclusive cylinders and key profiles.
- Possibility of sign in a group civil insurance (cheaper than an individual one)
- Special Offers for the Members.
- Vicuña Group Identity Card.
- Possibility of direct contact and address among the members of the Group
- Annual Meeting of all the Vicuña Group Members.
- Information through Social Net Services

Web and Social Networking

www.vicunatools.com

Vicuña Herramientas Técnicas is on the net, with a renewed and modern service, where you will find all our tools, training courses, the members of our Group, and now a chat where you can share your professional ideas with all around the world locksmiths. Technical Assistance

facebook & twitter

Vicuña Herramientas Técnicas is on the Social Networking, in Twitter and Facebook, to share our offers, our training courses information and our information about events where Vicuña is.

Follow us in Facebook and Twitter. Join us to share our friends and members thoughts.

Purchase Conditions

All goods are forwarded at buyer’s cost and risk under our discretion without our obligation for the cheapest or safest shipment. Shipment is always carried out at buyer’s risk.

The buyer has to inspect the goods immediately upon receipt especially regarding weight, number of items and outward appearances. In case of justified written notification within 15 days after receipt of goods regarding provable material or performance faults we can either decide to rectify the fault without cost to you or after return of the goods we can either send new goods ex work or credit the amount of the returned goods. In that case Vicuña Herramientas Técnicas S.L will contract the shipment company. All further claims whatever they may be, especially regarding rescission, abatement or compensation in damages - even in cases of special guarantees or promises- are excluded. Please note that CDs, videos, books and used tools are non-returnable.

Every order must imply the acceptance of our sales conditions.
